PROFILE

With extensive experience in data analysis, reporting, and cross-functional collaboration, I am passionate about using data to deliver insights, streamline processes, and create tangible business value. Combining skills in SQL, Python, and BI tools with strong business acumen, communication skills, and project management capabilities.

SKILLS

- SQL, Python, Power BI, Power Query, Excel
- GitHub, Postman
- Data visualization and dashboards
- AI workflows and automation (CustomGPTs, Agents, Ollama, Claude Code)
- Requirements specification and agile methodologies
- Cross-functional communication, stakeholder management, and project management

EXPERIENCE

Data Analyst & Automation Lead | [Retriever](#) | *Jan 2025 – Mar 2026*

- Queried data with SQL and visualized AI automation processes using Excel and Power BI for KPI reporting
- Supported ERP merger using Excel reports to ensure accurate invoicing
- Supported CRM merger by developing a product bridge and testing an internal reporting tool
- Automated client solutions using an internal AI system for relevance checking and summarization across a large client portfolio

Key Achievement: Developed Power BI dashboards using SQL, Excel, and Power BI to visualize the development of AI-automated solutions.

Software Tester | [Infomedia](#) | *Jan 2024 – Dec 2025*

- Tested two media monitoring platforms and used SQL to support data migration insights
- Gathered requirements and drafted specifications for new tools
- Served as Scrum Master for a development team, facilitating agile collaboration

Key Achievement: Worked closely with a team of developers to facilitate platform migration, testing new features and reporting bugs and defects.

Content Specialist | [Infomedia](#) | *Sep 2022 – Dec 2023*

- Delivered daily media monitoring to public and private sector clients
- Wrote article and broadcast summaries, and produced newsletters for multinational corporations and EU institutions
- Maintained documentation for summarization and relevance assessment, as well as a large library of summary prompts

Key Achievement: Contributed to the testing and rollout of a ChatGPT integration in our internal summarization tool, cutting summarization time in half.

EDUCATION

Aarhus University
